

THEKEDAAR

India Ka Apna Home Services Super App

Product Concept & Website Change Brief

Prepared for: Antigravity Design Team

Date: March 2026

What is Thekedaar?

Thekedaar is a two-sided digital marketplace that connects customers with local, verified home service professionals and construction contractors — all in one app. It has two sections: Chhota Kaam (micro services) and Bada Kaam (macro projects). Unlike Urban Company, Thekedaar does not train professionals — it digitizes the skilled local experts who already exist in every Indian neighbourhood.

1. The Problem We Are Solving

India has a massive, fragmented home services market. Every household needs plumbers, electricians, cleaners, painters, AC mechanics, and contractors — but finding trustworthy, skilled professionals is a pain point that has not been solved for Tier 2 and Tier 3 cities.

From the Customer's Side:

- No reliable way to find skilled local professionals digitally.
- Trust is built only through word-of-mouth — 'jaanpehchaan' referrals.
- No price transparency — haggling wastes time and creates frustration.
- No accountability if work quality is poor — especially in big projects.
- Platforms like Urban Company are English-first, Tier 1 city focused.

From the Professional's Side:

- Skilled local professionals (AC mechanic, plumber, painter) are limited to 10-15 known customers.
- No digital identity — invisible to the broader market.
- Income is seasonal and unpredictable.

- No formal payment record or income history for loans/credit.
- No pathway to grow from small jobs to bigger projects.

Market Size

India's home services market is estimated at INR 4,990 Billion+. Urban Company — the current leader — is still largely limited to Tier 1 cities, leaving the majority of India unserved.

2. Our Solution — The Thekedaar Platform

Thekedaar is a super app for home services with two distinct sections operating under one unified platform, one brand, and one trust framework.

	CHHOTA KAAM (Micro Services)	BADA KAAM (Macro Projects)
What it is	Daily home service bookings	Large construction & renovation projects
Examples	AC service, cleaning, plumbing, salon	Home construction, interior design, civil work
Ticket Size	₹200 — ₹5,000 per booking	₹50,000 — ₹50,00,000 per project
Frequency	High — weekly/monthly repeat	Low — once every few years
Revenue Role	Consistent cash flow engine	High ticket commission per deal
Trust Role	Builds platform trust with users	Leverages trust already built via Chhota Kaam

The Strategic Trust Funnel

This two-section model is not just a product decision — it is a strategic trust-building machine:

Step 1	Customer books a ₹500 AC service on Thekedaar. Professional arrives on time, verified, rated. Experience is smooth.
Step 2	Customer trusts Thekedaar. Books cleaning, electrician, salon — all through the app. Platform becomes habit.
Step 3	Same customer now needs a home renovation — ₹10 lakh project. Where do they go? Thekedaar — because trust is already built.

This is the Amazon model — start with low-risk, high-frequency transactions to build trust, then convert that trust into high-value decisions.

3. Our Core Advantage Over Urban Company

3.1 We Digitize. We Don't Train.

Urban Company spent INR 250+ Crore training professionals from scratch. Thekedaar does not need to. India's every gali, every mohalla already has:

- Ramesh bhai — AC and fridge repair expert with 15 years experience
- Suresh — plumber who has fixed pipes in the entire colony
- Munni didi — trusted house cleaning professional
- Pappu electrician — everyone in the neighbourhood calls him first

These professionals are already skilled, already locally trusted — they just have no digital identity. Thekedaar gives them that digital identity and connects them to the entire city's demand.

Factor	Urban Company	Thekedaar
Professional Source	Recruits & trains from scratch	Already skilled local professionals
Training Investment	INR 250+ Crore	ZERO — they already know their job
Onboarding Time	Weeks of training	Days — just verify & list
Trust Factor	Stranger trained by a company	Local person your neighbour already knows
Scalability	Needs training centers in every city	Locals exist in every city, town, village
Commission Charged	20–30% (high cost recovery)	8–12% (low cost, more attractive to join)
Tier 2/3 Reach	Limited — infrastructure needed	Natural — locals are already there
Branding	English, corporate, Tier 1 feel	Hindi, relatable, all-India feel

Key Differentiator

Urban Company trains professionals. Thekedaar FINDS them — they are already in your neighbourhood, already trusted, already skilled. We just give them a digital upgrade.

3.2 The Brand — Why 'Thekedaar' Wins

- 'Urban Company' is English — not relatable in Tier 2/3 cities.
- 'Thekedaar' is a word every Indian household already uses naturally.
- When someone needs a contractor, they say — 'ek accha thekedaar chahiye.'
- The name IS the category — like Google = search, Zomato = food delivery.
- Word-of-mouth becomes effortless — 'Thekedaar pe book kar' is simple, memorable.
- Works across Hindi belt, covering hundreds of millions of potential users.

4. How Thekedaar Works

4.1 For Customers

Step	Action
1 — Download	Download the Thekedaar app (iOS / Android / Web)
2 — Choose	Select Chhota Kaam or Bada Kaam from the home screen
3 — Pick Service	Browse service categories and select what you need
4 — Location	Enter your address and choose preferred date/time
5 — Match	Platform shows verified local professionals with ratings
6 — Book	Confirm booking — milestone payment activated for big jobs
7 — Track	Real-time updates — professional en route notification
8 — Pay	Pay via UPI, card, or wallet after service completion
9 — Rate	Rate the professional — builds community trust score

4.2 For Professionals / Contractors

Step	Action
1 — Register	Sign up on Thekedaar app as a service professional
2 — Verify	Submit Aadhaar + PAN + skill category + photo ID
3 — Profile	Platform creates a verified digital profile with ratings
4 — Go Live	Professional is listed and starts receiving customer leads
5 — Accept Jobs	Accept or decline job requests as per availability
6 — Complete	Complete the job, upload completion proof/photos
7 — Get Paid	Payment released to account within 24–48 hours
8 — Grow	Build ratings → get more leads → grow from micro to macro jobs

5. Trust & Safety Framework

Trust is the single most important factor in this market — especially in Tier 2/3 cities where 'jaanpehchaan' (word-of-mouth) drives all decisions. Thekedaar digitizes this trust through multiple layers:

5.1 Professional Verification

- Aadhaar + PAN verification — mandatory for all professionals.
- Video introduction uploaded to profile — customer sees the face before booking.
- Skill category self-declaration — verified by initial customer reviews.
- Background check for macro project contractors.

5.2 Community Trust System

- Hyperlocal reviews — reviews from customers in the same locality carry higher weight.
- 'Aapke mohalle mein X kaam kiye hain' — platform shows locality-specific job count.
- Neighbour verification badge — if someone from your neighbourhood has used and rated this professional.
- Inspired by: Nextdoor (neighbourhood trust), Airbnb ('your friend stayed here').

5.3 Payment Protection — Milestone Model

Payment Stage	Micro Services	Macro Projects
Advance	Full payment via escrow at booking	30% released on project start
Mid-point	N/A	40% released on mid-point inspection
Completion	Released after customer confirmation	30% released after final approval
Dispute	Refund / re-service within 48 hours	Security deposit + mediation cell

5.4 Dispute Resolution

- Contractor Security Deposit: All contractors deposit a refundable amount at onboarding. Proven disputes are compensated from this deposit.
- Rectification Window: Professional gets 7 days to fix issues before penalty is applied.
- Platform Mediation Cell: Dedicated team reviews photo/video evidence and gives verdict.
- Insurance Tie-up (Phase 2): Partner with Bajaj Allianz / ICICI Lombard for project insurance on large jobs.

5.5 Retention Through Rewards

Reward Type	For Customers	For Professionals
Cashback	Scratch card after every booking (inspired by GPay)	Bonus on completing 10 jobs/month
Streaks	Loyalty points on consecutive monthly bookings	Weekly job streak bonuses (inspired by Uber)
Subscription	₹99/month — priority booking + free consultation	₹299-999/month — priority leads + verified badge
Referral	₹50 wallet credit per friend referred	Extra leads for every professional referred
Leaderboard	Top customer of the month — special offers	Top Contractor badge — featured on home screen

6. Revenue Model

Thekedaar operates a multi-stream revenue model across both sections — ensuring sustainability from Day 1 and scalability over time.

Revenue Stream	Chhota Kaam	Bada Kaam	Phase
Commission per Job	8–12% of service value	5–8% of project value	From Day 1
Lead Fee from Pro	₹50–150 per confirmed lead	₹500–2,000 per lead	From Day 1
Pro Subscription	₹299–499/month	₹999–1,999/month	Month 3+
Featured Listing	₹99–299/week	₹999–2,999/week	Month 3+
Customer Subscription	₹99/month loyalty pass	₹299/month priority access	Month 6+
Insurance Premium	1% of service value	2–3% of project value	Year 2+
B2B / Builder Tie-ups	Housing society contracts	Bulk project pipelines	Year 2+
Data & Analytics	Demand trends by area	Project cost benchmarks	Year 3+

Sustainability Edge

Since Thekedaar does NOT train professionals, our cost base is dramatically lower than Urban Company. This means we reach profitability faster, with less funding, and can offer lower commissions to attract more professionals.

Revenue Growth Phases

Phase	Timeline	Primary Revenue	Target Monthly Revenue
Launch	0–6 months	Lead fees + listing fees	₹20,000 – ₹50,000
Growth	6–18 months	Commission + subscriptions	₹2,00,000 – ₹5,00,000
Scale	18–36 months	All streams + insurance + B2B	₹20,00,000+
Mature	36 months+	Full ecosystem + data + native products	₹1 Crore+/month

7. Website Change Brief for Antigravity

The following section outlines the key changes required to the Thekedaar website to reflect the updated product concept. Please review each section carefully.

7.1 Homepage — Hero Section

- Headline should reflect the two-section positioning. Suggested: 'Chhota Kaam ho ya Bada Kaam — Thekedaar hai na!'
- Two prominent CTA buttons: one for Chhota Kaam, one for Bada Kaam.
- Subheadline should mention local, verified professionals — not 'trained' professionals.
- Visual language: local, Indian, warm — avoid corporate stock imagery.
- Add trust signals above the fold: 'Aadhaar Verified', 'Rated by Your Neighbours', 'Secure Payments'.

7.2 Navigation / Menu Structure

Current / Suggested Label	Section	Notes
Chhota Kaam	Main Nav	AC Service, Cleaning, Electrician, Plumber, Salon, etc.
Bada Kaam	Main Nav	Civil Contractor, Interior Design, Renovation, Construction
For Professionals	Main Nav	Onboarding page for local service providers
How It Works	Main Nav	Simple 3-step explainer for both customers and professionals
Trust & Safety	Main Nav	Verification, milestone payments, dispute resolution

7.3 Chhota Kaam Section Page

- Service category cards: AC Servicing, Fan Repair, RO/Water Purifier, Bathroom Cleaning, Home Cleaning, Electrician, Plumber, Carpenter, Salon at Home, Pest Control, Appliance Repair.
- Each card: icon + service name + starting price + 'Book Now' button.
- Show locality-based availability: 'X professionals available near you.'
- Display ratings and number of jobs done in the user's area.

7.4 Bada Kaam Section Page

- Project category cards: Home Construction, Home Renovation, Interior Design, Commercial Projects, Plumbing Overhaul, Electrical Wiring.
- Each card should show: estimated project range, average rating, number of verified contractors.
- Prominent mention of Milestone Payment Protection and Dispute Resolution.
- 'Get Free Quote' CTA — leads to a form where contractors can submit bids.

7.5 For Professionals — Onboarding Page

- Headline: 'Kya aap ek skilled professional hain? Apni service digital karo — FREE mein!'
- 3-step onboarding visual: Register → Verify → Start Earning.
- Highlight benefits: More customers, digital payment, verified badge, income growth.
- Comparison box: 'Pehle: 10-15 customers — sirf jaanpehchaan se. Ab: Poore city ki demand — Thekedaar ke saath.'
- Simple form: Name, City, Service Category, Phone Number, Aadhaar Upload.

7.6 Trust & Safety Page

- Explain Aadhaar verification process with visual steps.
- Show Milestone Payment flow as a timeline graphic.
- Explain the Dispute Resolution process clearly.
- Add section on Rewards — cashback, streaks, Pro badge.
- Show the UC Promise equivalent: 'Thekedaar Guarantee — kaam accha nahi laga? Hum theek karenge.'

7.7 General Design Direction

- Color palette: Warm, energetic, Indian — avoid cold corporate blues.
- Typography: Hindi + English mixed — bilingual labels where relevant.
- Photography: Real local professionals at work — not stock images of suited professionals.
- Mobile-first design — primary audience is smartphone users in Tier 2/3 cities.
- App download CTA must be prominent on every page.

8. SWOT Analysis

	Positive	Negative
Internal (Our Control)	STRENGTHS • Zero training cost • Local trust already exists • Strong relatable Hindi branding • Dual section covers full market • Lower commission = more professionals • Trust funnel from micro to macro	WEAKNESSES • New brand — awareness building needed • No quality control via training • Dependent on professionals being digitally ready • Dispute resolution in construction is complex
External (Market Forces)	OPPORTUNITIES • Tier 2/3 cities — massive untapped market • 40,000+ local professionals have no digital presence • INR 4,990 Bn+ home services TAM • Urban Company weak in small cities • Growing smartphone + UPI penetration	THREATS • Urban Company scaling down to Tier 2/3 • New well-funded startups entering • Professionals bypassing platform (disintermediation) • Regulatory changes around gig economy

9. One-Page Pitch Summary

Problem:

Finding skilled, trustworthy home service professionals in India — especially Tier 2/3 cities — is broken. It relies entirely on word-of-mouth. Skilled local professionals have no digital presence and are limited to 10-15 known customers.

Solution:

Thekedaar — a two-section super app. Chhota Kaam for daily services (AC, cleaning, plumber) and Bada Kaam for large projects (construction, renovation). We digitize already-skilled local professionals — we do not train them.

Why We Win:

Zero training cost vs Urban Company's INR 250 Crore spend. Lower commissions attract more professionals. Hindi branding ('Thekedaar') resonates across all of India. Micro-to-macro trust funnel converts daily bookings into high-value project clients.

Revenue:

Commission (8-12%) + Lead Fees + Pro Subscriptions + Featured Listings + Customer Loyalty Pass + Insurance Premium + B2B Tie-ups. Multiple streams from Day 1.

One Line:

"Urban Company trains professionals. Thekedaar finds them — they are already in your neighbourhood."
